Thank you, Joe. I still did not feel comfortable making the change as fully as you recommended. I thought we would lose some trust with the consulting parties by changing that section too much. I do not have a good response to the NTHP comment on why these additional studies were not conducted over the past year.

A. Through the consultation process with consulting parties, the FTA and the City have not identified adverse effects on known Traditional Cultural Properties (TCPs). Within thirty (30) days of execution of this PA, the City shall undertake a study to determine the presence of previously unidentified TCPs within the APE, which includes cultural landscapes if present. Prior to construction commencement, the City shall meet with the SHPD, consulting parties, and other parties with expertise, including Native Hawaiian organizations (NHOs) to discuss and identify potential TCPs, as defined by the National Register Bulletin 38, *Guidelines for Evaluating and Documenting Traditional Cultural Properties*. Building on cultural practices analysis already completed to address Act 50, Session Laws of Hawaii 2000 requirements, the City shall undertake studies to evaluate these TCPs for NRHP eligibility in accordance with guidance in National Register Bulletin 38. The TCP study shall be completed by qualified staff with experience in ethnographic studies and TCP assessments for NRHP eligibility.

Here is a version that makes fewer changes, still calls for the TCP study, but would not require that study prior to the ROD for 4(f) purposes.
